A short description of the entry to include modifications to the model if appropriate.

Title: Small Pipe Load

Type - Scratch Built,

This load was built using standard bendy-straws that were cut just below the flexible part. Straws were painted flat black and then lightly weathered with dark brown to add variations/weathering. The supports for each load were made using leftover scrap wood parts around the workbench. Banding was made with electrical tape cut to size, supports on the flatcar were made from bass wood.
